

EMPLOYEE INFORMATION SYSTEM

Project 2

Item	Details
Project Title	Employee Information System
Project Number	Project 2
Portfolio Series	Microsoft Excel Office & Data Management Portfolio
Course	Excel Skills for Business: Essentials
Software Used	Microsoft Excel
Prepared By	Olivia Morales Acosta
Date Completed	August 2026
Version	1.0

1. Project Summary

Purpose

Develop a Microsoft Excel workbook for storing, organizing, and maintaining employee records.

Project Type

Office Data Management Spreadsheet

Software

Microsoft Excel

Difficulty

Beginner

2. Project Objectives

General Objective

Develop an Excel workbook that manages employee information.

Specific Objectives

- Record employee details.
- Organize employee contact information.
- Track employment status.
- Produce an organized employee database.

3. Workbook Features

- Employee Master List
- Department Tracking
- Employment Status
- Professional formatting
- Print-ready worksheet

4. Excel Skills Demonstrated

- Excel Tables
- Cell Formatting
- Number Formatting
- Sorting
- Filtering
- COUNTA
- COUNTIF
- Freeze Panes
- Print Setup

5. Worksheets

Project Info

Contains:

- Project Name
- Location
- Date
- Prepared By

Employee Information

Contains:

- Employee records
- Department information
- Employment details

Summary

Contains:

- Total Employees
- Active Employees
- Employees per Department

6. Main Calculations

Calculation	Formula	Purpose
Total Employees	COUNTA (Customer ID)	Counts all employees
Active Employees	COUNTIF (Status, "Active")	Counts active employees
IT Employees	COUNTIF (Department, "IT")	Example department count

7. Sample Inputs

- Employee ID
- Last Name
- First Name
- Department
- Position
- Date Hired
- Contact No.
- Employment Status

8. Outputs

- Total Employees
- Active Employees
- Employees by Department

9. Validation

- ✓ Verified employee count
- ✓ Verified department counts
- ✓ Tested sorting and filtering
- ✓ Checked print layout

10. Lessons Learned

- Organized employee records in a structured format.
- Applied counting functions for summary reports.
- Improved spreadsheet organization.
- Developed a practical office management workbook.

11. Future Improvements

- Employee ID lookup
- Data Validation lists
- Conditional Formatting
- Dashboard
- PivotTables

12. Design References

Microsoft Excel

The workbook uses Excel Tables, sorting, filtering, Freeze Panes, and COUNTIF functions to organize employee records.

Official References

- Microsoft. Create and format tables in Excel.
- Microsoft. Sort data in a range or table.
- Microsoft. Filter data in a range or table.
- Microsoft. Freeze panes to lock rows and columns.
- Microsoft. COUNTIF function.

Business Reference

The workbook structure is modeled after an Employee Master File, which is commonly maintained by Human Resources departments.
